

PATRICK HARBISON

Senior Platform Engineer | Site Reliability Engineer

337-377-6607 | pharbison125@gmail.com | pharbison.dev | Lake Charles, LA

PROFESSIONAL SUMMARY

Site Reliability and Platform Engineering professional with 12+ years of experience building and operating infrastructure at scale. This includes building and maintaining Kubernetes deployments, CI/CD systems, and automation frameworks across multi-site large enterprise environments. Proven track record driving platform modernization in enterprise business environments, owning technical direction for key technologies such as Kubernetes, CI/CD, and automation platforms serving infrastructure and developer teams, with the goals of reducing deployment friction, and establishing reliability standards adopted enterprise wide.

TECHNICAL SKILLS

Container & Orchestration: Kubernetes, Docker, Podman, ArgoCD

Automation & IaC: Ansible, Puppet, AWX, AAP

Languages: Go, Python, Bash, Javascript

CI/CD: GitLab CI, Drone CI, Jenkins, Github Actions, pipeline design and testing

Observability: Zabbix, Prometheus, Grafana, InfluxDB, Telegraf

Systems & Networking: Ubuntu, Red Hat, Windows Server, Cisco networking, VMware

PROFESSIONAL EXPERIENCE

Senior Platform Engineer — O'Reilly Auto Parts

09/2022 – Present

- Defined enterprise-wide automation and platform standards using Ansible, Puppet, Go, and Python, reducing new-server on-boarding time by over 80% and establishing a unified engineering baseline adopted across 1,000+ operations and development staff.
- Led cross-functional efforts to establish Kubernetes, Docker, and Podman operational standards and governance across all infrastructure engineering teams, supporting a rapidly growing service footprint of dozens to over 100 deployments per day.
- Evaluated and drove adoption of an end-to-end Kubernetes stack over alternative tooling, defining the deployment model and roll-out strategy for future internal Kubernetes clusters, improving deployment consistency by over 90% and platform stability.
- Mentored 100+ engineers on platform tooling and GitOps practices, developing internal documentation, training materials, and classes that reduced on-boarding time and increased engineer confidence using internal platforms.

Site Reliability Engineer — Citadel Completions, LLC

09/2021 – 09/2022

- Established policies and deployed internal GitLab services, CI pipeline testing, and GitOps deployment workflows supporting rapid multi-environment application delivery for in-house applications.
- Introduced metrics collection, monitoring, and alerting using Zabbix, enabling infrastructure observability and evidence-based operational improvement.
- Automated Windows Server, Linux Server, and Cisco network management with AWX and Ansible, improving network reliability and proactively identifying points of failure.

Linux System Administrator — *Lake Charles Memorial Hospital*

05/2018 – 09/2021

- Supported and maintained 500+ Windows, Linux, and Unix servers across multiple campuses, maintaining hundreds of internal and customer-facing applications.
- Reduced Cisco switch deployment times by over 90% through Ansible and AWX automation, including training administrators on platform development and use.
- Developed automated software deployment processes, reducing deployment times by more than 75% for critical hospital platforms.
- Identified, documented, and coordinated remediation of an undisclosed flaw in critical clinic software, preventing a public data leak of thousands of patients' and employees' private records.

Lead Technician / Linux System Administrator — *Bayou Technologies* 05/2010 – 05/2018

- Deployed and managed Linux hosting infrastructure for 70+ WordPress websites, ensuring uptime and security.
- Introduced and deployed VMware virtualization and Cisco networking for internal company services.
- Led technical teams performing infrastructure support, systems administration, and managed services operations for 100+ local businesses and individuals.
- Developed SOPs and operational processes supporting the company's transition from a break/fix IT services model to a managed services provider model.

EDUCATION & CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) – In Progress
- AWS SysOps Administrator – Associate
- Cisco Certified Entry Networking Technician (CCENT)
