

PATRICK HARBISON

Senior Platform Engineer | Site Reliability Engineer

337-377-6607 | pharbison125@gmail.com | pharbison.dev | Lake Charles, LA

PROFESSIONAL SUMMARY

Site Reliability and Platform Engineering professional with 15+ years of experience building and operating infrastructure. This includes building and maintaining large Linux environments, virtualization environments, network deployments, Kubernetes deployments, CI/CD platforms, and automation frameworks across multi-site enterprise environments. I maintain a proven track record of driving stable platform modernization in enterprise business environments, ownership of technical direction for key technology adoption in order to better serve infrastructure, operations, and developer teams, with the goal of reducing deployment friction, minimizing support workload, and establishing reliability standards adoption organization wide.

TECHNOLOGY

Container & Orchestration: Kubernetes, Docker, Podman, ArgoCD

Automation & IaC: Ansible, Puppet, AWX, AAP

Languages: Go, Python, Bash, Javascript

CI/CD: GitLab CI, Drone CI, Jenkins, Github Actions

Observability: Zabbix, Prometheus, Node Exporter, Grafana, InfluxDB, Telegraf

Systems: Debian, Ubuntu, Rocky Linux, Red Hat, Windows Server, VMware

Networking: Cisco, Juniper, HP, Palo Alto

PROFESSIONAL EXPERIENCE

Senior Platform Engineer — O'Reilly Auto Parts

09/2022 – Present

- Defined enterprise-wide automation and platform standards for development with Ansible, Puppet, Go, and Python, reduced new-server on-boarding time by over 80% and established standards used by 1,000+ operations and development staff.
- Led cross-functional efforts to establish Kubernetes, Docker, and Podman operational standards and governance across infrastructure engineering teams, supporting a rapidly growing service footprint with the goal of supporting hundreds of deployments per day.
- Evaluated and drove adoption of Kubernetes development and operations workflow defining the deployment model and roll-out strategy for future internal Kubernetes clusters, improving deployment consistency by over 90% while preparing for the future with containerized applications.
- Mentored 100+ engineers on platform tooling and GitOps practices, developed internal documentation, training materials, and created classes that reduced on-boarding time and increased engineer confidence using internal platforms.

Site Reliability Engineer — Citadel Completions, LLC

09/2021 – 09/2022

- Established policies and deployed internal GitLab services, CI pipeline development/testing, and GitOps deployment workflows supporting rapid multi-environment application delivery for in-house applications.
- Introduced metrics collection, monitoring, and alerting using Zabbix, enabling infrastructure observability and evidence-based operational improvements.
- Automated Windows Server, Linux Server, and Cisco network management with AWX and Ansible, improving network reliability and proactively identifying potential points of failure.

Linux System Administrator — *Lake Charles Memorial Hospital*

05/2018 – 09/2021

- Supported and maintained 500+ Windows, Linux, and Unix servers across multiple campuses, maintaining hundreds of internal and customer-facing applications.
- Reduced Cisco switch deployment times by over 90% through Ansible and AWX automation, including training administrators on platform development and use.
- Developed automated software deployment processes, reducing deployment times by more than 75% for critical hospital platforms.
- Identified, documented, and coordinated remediation of an undisclosed flaw in critical clinic software, preventing a public data leak of patient's HIPAA protected data.

Lead Technician / Linux System Administrator — *Bayou Technologies* 05/2010 – 05/2018

- Deployed and managed Linux hosting infrastructure for 70+ WordPress websites, ensuring uptime and security.
- Introduced and deployed VMware virtualization and Cisco networking for internal company services.
- Led technical teams performing infrastructure support, systems administration, and managed service operations for 100+ local businesses and individuals.
- Developed SOPs and operational processes supporting the company's transition from a break/fix IT services model to a managed services provider model.

EDUCATION & CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) – In Progress
- AWS SysOps Administrator – Associate
- Cisco Certified Entry Networking Technician (CCENT)
- Lantec Corporate Training, MS 20740 C Installation, Storage, and Compute with Windows Server 2016
- SOWELA Technical Community College, Information Systems – Cisco Computer Networking
- South Beauregard High School, High School Diploma
